# J7: Snip It Off: Last Sound

Lesson Objective: Using manipulatives and a counting mat for visual aids, children will say the phonemes in a three-phoneme spoken word in correct order, then delete the last phoneme to create a new two-phoneme spoken word.

### Materials

- Snip It Off: First Sound mat
- sound counting cards
- word list

Print out the word list, mat and sound counting cards, preferably on sturdy cardstock paper. Cut apart the sound counting cards. The word list is for the adult's reference only.

Set the mat in front of the child, with the sound counting cards next to it.

### Activity

#### Video: How to play Snip It Off: Last Sound

Explain to your child how you can have one word and then take a sound away from the end of it, "snipping it off," to make a brand-new word with the parts that are left. Review dividing words into individual sounds, and emphasize counting the sounds.

Adult: Sometimes you can snip a sound off the end of a word to make a

brand-new word. Let me show you how.

Listen to my word: fuse.

"She lit the fuse for the fireworks." Fuse. What word?

Child: Fuse!

Adult: What's the first sound you hear in fuse?

Listen: fff-<u>uuu</u>\*-zzz.

Child: fff.

# J7: Snip It Off: Last Sound (continued)

Adult: Yes. Put a card for the fff sound here. [point to top left "window" on mat]

Child: [Puts down sound counting card.]

Continue this way until the child has identified the second and third sounds in fuse and has put a sound counting card in the top row of the mat for each sound.

Adult: Now point to each card in the top row and say its sound, in order.

Always start here. [Point to top left "window."] Get ready.

Child: fff [points to first card] \(\bar{u}\bar{u}\bar{u}\) [points to second card] zzz [points to third card]

Adult: Now I'm going to snip off a part of fuse. You find the sounds I say and move those cards from the top row to the bottom row. Get ready: few. "I have just a few pennies."

What word?

Child: Few!

Adult: What's the first sound you hear in few?

Child: fff.

Adult: Yes. Find the card you used for the fff sound in fuse and slide it down to the bottom window here. [Point to bottom left "window."]

Continue this technique of identifying the sound and moving the sound counting card for the ūūū in few.

Adult: Touch under the cards in the bottom row and say the sound for each

card.

Child: [points to left card] fff [points to right card] ūūū.

Adult: Say the sounds fast. What word?

Child: Few!

Adult: Look at the top row of windows. Tell me what sound

you snipped off of fuse to make few?

## J7: Snip It Off: Last Sound (continued)

Child: zzz!

Adult: Yes. You snipped off the zzz sound at the end of fuse,

and the sounds that were left made the word few.

Have the child remove the sound counting cards from the mat to get ready for the next round of the game. "Snip" sounds off of six to ten words in a session.

NOTE: A line above a vowel (for example,  $\bar{a}$ ) indicates that it is the "long" vowel sound, which is the same as the vowel's name.

### Small Groups (2-5 children)

Additional Materials:

- enough work mats and sound counting cards for each child
- optional: pocket chart

Adaptation: Read the main activity, watch the video, and follow the instructions above, with the following changes:

Remind the children how they "snipped" a sound off the beginning of a word to make a new word. Explain that they are now going to snip a sound off the <u>end</u> of a word to make a brand-new word.

Do the activity as a group. Demonstrate how to place the sound cards on the mat as you say the sounds, providing several examples. When the children have a grasp of the concept, give each one a work mat and three sound cards. Have the children verbalize the phonemes as they manipulate their counters on their mats. Use words from the word list to provide many opportunities for practice.

Call on different children to respond for each step of the process and to say the phoneme as they manipulate its corresponding sound marker. Then the whole group can repeat and follow what that child is doing. Have the whole group say the new word together.
